

# PROTECTING FLORIDA'S SKIES

Florida is drawing a clear line in the sky.

**No geoengineering, no atmospheric experimentation, no exceptions.**

While our state already bans weather modification, the new law takes that protection further ensuring strong enforcement against unauthorized activities.

Florida will not be used as a testing ground for chemical or atmospheric manipulation.

We're taking a stand to stop the release of substances meant to alter our weather or environment.

## Criminal Charges for Violators

**Tampering with our skies is now a serious crime.**

Anyone caught manipulating the weather faces a third-degree felony, with up to 5 years in prison and fines up to \$100,000.

## Bans on Chemical Releases

**No chemicals. No manipulation. No exceptions.**

The law bans the injection, release, or dispersion of any substances into the atmosphere intended to alter weather, climate, temperature, or sunlight.

## Accountability for Aircraft Involvement

**If you fly it, you're liable.**

Aircraft operators and controllers who assist in geoengineering activities may be hit with additional fines of up to \$5,000.

## Report Online

Submit a report easily using the official online form at [reportfloridaskies.com](http://reportfloridaskies.com).

## Email or Call

Contact the DEP with any credible concerns.
